

Dental-Union GmbH Fundraiser for Bärenherz

As in previous years, the sales campaign for OMNIDENT products in July/August 2016 via the „AberHallo“ flyer promotion has once again generated an impressive amount of money.

Thanks to our faithful customers, Dental-Union GmbH was once again able to present a cheque in the amount of € 6,000 to Kinderhospiz Bärenherz in Wiesbaden.

Established in 2003, the Bärenherz Foundation supports facilities for families with children who are terminally ill and have a short life expectancy, especially children's hospices.

"Bärenherz has brought back some of our quality of life..." is the very fitting conclusion of a mother, summing up exactly what a children's hospice aims to be: a safe haven for families with children whose lives are being cut short and who have a terminal illness. This is where they find advice, quality care, loving support, relief and comfort, from the diagnosis to the child's death and beyond.

Supported facilities currently include the children's hospices in Wiesbaden, in Markkleeberg near Leipzig and the "Nesthäkchen" children's house in Heidenrod-Laufenselden in the Rheingau-Taunus district, a permanent care facility for 22 severely disabled and seriously ill children, adolescents and young adults.

The Bärenherz Foundation is a charitable foundation under private law and dependent on donations and endowments in order to fulfil their statutory purpose. Approximately 2 million euros per year are currently disbursed in support of the existing facilities, which are only partially financed by nursing rates— with an upward trend.

"We are extremely proud that so many of our customers support our campaign and thereby enable us to make a contribution to improving quality of life," says the management of Dental-Union GmbH.
